Information System Support Section

NMCI Update

13 October 2004

NMCI Costs for Siprnet

- **Dual NMCI Seat is approximately $5K more a year then a regular seat**
- **A siprnet drop will cost $2.7K**
- **A community seat is $252 a month**

NMCI Costs for Moves

- **$275.00 to move a machine unless it's within the same office then it's free**
- **$775.00 to add an additional wall plug**

Seat Issues

- **CD/RW are located in every compaq we have and were placed in every section so that all sections would have that capability. Currently, LSS does 90% of the work. It is just easier and we should.**
- **Under NMCI all senior level people (defined as GS-15's/0-6's and above) will have both CD/RW's and DVD players at their desktop. Most other seats contain CD/RW.**
- **I have gone through the seats a million times to make sure everyone is taken care of this is very difficult when you have the turn over we have.**
- **You can change a seat but it can take up to 6 weeks.**

Main Concerns

- **Software costs**
- **Misc costs Email 25 mg is 2.33, for someone who currently has 1 gig of email that is 93.20 extra a month, still not sure what they are doing about email and pst files**
- **Shared disk space is 31.27 a month for 10 gig**
- **Software testing (Infrastructure)**
  - **Testing goes this Saturday**
  - **Need sites to test by Noon today**
- **Seat cutover may begin in late January with Battalion being the test site.**
